

Smithsonian K-12 STEM Education Action Planning Institute July 25-27, 2022 Free Online

Institute Goals

- **INNOVATION**

What does innovation look like in a K-12 STEM classroom?

- **INCLUSION**

How do we meet the needs of all K-12 STEM students and teachers through diversity, equity, accessibility and inclusion (DEAI)?

- **SUSTAINABILITY**

How can STEM Education for Sustainable Development (STEM4SD) prepare our students for a changing planet?

FREE ONLINE ACTION PLANNING INSTITUTE FOR K-12 EDUCATORS, ADMINISTRATORS & RESEARCHERS

The Smithsonian Science Education Center will convene educators, subject matter experts, school administrators, and education organizations to explore actionable approaches, backed by research and best practices in science, engineering, and education. Through this institute, participants will engage with the Smithsonian's action planning process, and build out an action plan to take action in their own school or community on one or more of these topics: innovation, inclusion, and sustainability.

Reserve your spot now! Register free at:
https://ssec.si.edu/2022_API

Participants of the institute will be eligible for up to 15 Professional Development credit hours based on the sessions of the institute that they attend and record, and upon successful completion of an Action Plan.
