

# ESTEP 2022 for 6th grade earth science teachers!

The ESTEP 6th grade professional development is a one week, bootcamp style, regional workshop that incorporates earth and space science content with teaching strategies to get you thinking about changing your teacher craft to help your students make sense of science. We'll walk you through investigations that you can use no matter where you are in your transition to the new standards – you'll learn about phenomena, storylines and 3-dimensional strategies by DOING the science!

## Summer 2022 ESTEP Dates

July 18 – 22	Metro Area
July 25 – 29	Mankato
August 8 – 12	Alexandria

Cost is \$390.00

### MnSTA/ESTEP Diversity, Equity and Inclusion Statement

We are committed to reflecting the diversity of Minnesota educators that participate in our programs. We are especially focused on teachers of BIPOC and underrepresented populations, alternatively licensed educators, and educational assistants working toward licensure.
