Pollinator Habitat Workshop

August 13 – 15, 2018

Location: Buffalo High School, Buffalo, MN

Agriculture and Natural Resource Teachers!

Learn how to develop pollinator habitat with engaging interdisciplinary activities for establishing, managing, and monitoring prairie habitat suitable for monarch butterflies, other insect pollinators, and grassland birds. This workshop will show you how to design and implement on-the-ground projects ranging in scale from small pollinator gardens on school grounds, to projects of one or more acres along farm fields, ditch banks, solar farms, or power line rights-of-way.

Credits: 2 graduate credits from the UW-Madison with tuition waived. There is a registration fee for the credits.

Includes: New Pollinator Habitat Curriculum Guide, team activities, cross-curricular connections, supplies, resources for the classroom, expert leaders, field trips, and a \$200 stipend.

Invite your colleagues! We recommend teams of two including another teacher, parent, or community member from your school.

Register online at: go.wisc.edu/n8mx34

Sponsored by Sand County Foundation & University of Wisconsin-Madison Earth Partnership Program with financial support from Enel Green Power North America, Inc., and the Monarch Joint Venture.
